

October 2002

Dear Actel Customer,

Thank you for choosing the Actel Core1553BRT intellectual property core. Actel IP cores are specially designed to work effectively with your Actel silicon devices. Enclosed with this letter is Core1553BRT version 2.0. Test Systems, Inc has certified this core to meet MIL-STD-1553B requirements. This core combined with Actel devices is an excellent solution to meet the requirements of a variety of severe operating environments, including military, space, avionics, and ocean-going applications. Version 2.0 supports a variety of Actel device families:

- Axcelerator
- ProASIC^{PLUS}
- SX
- SX-A
- RTSX-S

Actel's Core1553BRT comes in 12 or 16 MHz varieties as an evaluation, netlist or RTL (source) version. For the netlist and RTL versions, there is a testbench and complete documentation including a release note, datasheet and user guide. Actel also offers a Core1553BRT evaluation board that you may find useful to accomplish your design more quickly. Please contact Actel sales for more information regarding this board.

For technical support or more information, please contact Actel's hotline (800-262-1060) or visit our web site at www.actel.com.

Thank you again for choosing Actel intellectual property.

Best Regards,

Ian Land
Senior Product Line Manager, IP Solutions Group
