

Implementation of Lead-Free Products At Microsemi Power Products Group – RF Compliance with the RoHS 2002/95 Directive

In response to increased conscientiousness for environmental preservation across the globe, the need for highly reliable lead-free components suitable for use in electronic assemblies is receiving increasing attention within the semiconductor manufacturing industry. Microsemi Power Products Group – RF is a supporter of the RoHS Directive based on EC Treaty Article 95, is actively involved in developing products that meet the requirements of a lead-free assembly for all our customers.

See table below for schedule of RF RoHS products:

Microsemi Power Products Group - RF (Order entry site)	Package Affected By RoHS Directives	Availability Date for RoHS Compliant Versions
Montgomeryville	All plastic packaged RF transistors (Power Macro, Macro T, Macro X, SO-8, SOT-23 & SOT-143 packages)	Available as an option on October 1, 2005. Add "G" to end of part number
Santa Clara	None	All products are RoHS compliant NOW
