Product Discontinuance Notification (PDN) No: PDN19021

Subject
Last Time Buy for PolarFire ES FPGA Splash Kits

Description
Microsemi is announcing a last time buy for the PolarFire ES FPGA Splash kit (MPF300-SPASH-KIT-ES).

Reason for Discontinuance
The PolarFire ES Evaluation kit is being discontinued due to the introduction of PolarFire Evaluation kit with production silicon (MPF300-SPASH-KIT).

Customer Impact
Customers can order PolarFire ES Splash kit while supplies last, but no more PolarFire ES Splash kits will be manufactured.

It is recommended that customers use the PolarFire Splash Kit (MPF300-SPASH-KIT) built with the production silicon MPF300T-1FCG484E for new designs.

The programming files for the MPF300-SPASH-KIT needs to be regenerated using Libero v12.1 (or higher). The programming file used by the MPF300-SPASH-KIT-ES cannot be programmed directly on the MPF300-SPASH-KIT.

Any design created for MPF300-SPASH-KIT-ES has to be regenerated using Libero v12.1 (or higher) for MPF300-SPASH-KIT.

Important Dates
Last Order Date: These kits are no longer available.

Last Shipment Date: Not applicable

Note:
The PolarFire Splash Kit uses the same family of silicon as the ES units, and has been tested across the full industrial temperature range from 0 °C to 100 °C. For more information on the superior functionality and capabilities of PolarFire production FPGAs, see ER0218: PolarFire FPGA Production Devices Errata.
Contact Information
