May 27, 2009

SUBJECT: JANS, JANTXV, JANTX and JAN Wafer Fabrication Certification  
MIL-PRF-19500N, FSC 5961

Mr. Mark Gabler  
Microsemi PPG  
405 S.W. Columbia Street  
Bend, OR 97702

Dear Mr. Gabler:

Your facilities at 405 S.W. Columbia Street, Bend, Oregon were audited by Mr. Kyle Carpenter, Mr. Carl Dello-Stritto & Mr. Gaston Nash of this Center and Mr. Sam Markand of the Aerospace Corporation on October 21<sup>st</sup> & 22<sup>nd</sup>, 2008 for compliance with the JANS Manufacturer's Certification requirements of MIL-PRF-19500N.

Compliance with these requirements has been successfully demonstrated. Therefore, Microsemi PPG is considered a certified wafer fabrication facility and eligible to supply FET Semiconductor wafers in accordance with the requirements of MIL-PRF-19500N. Please note that this approval covers JANS, JANTXV, JANTX, and JAN quality levels.

This certification will normally be valid for two years from the date of this letter and can only be terminated by written notification from this Center. For the duration of the certification, the manufacturer is subject to periodic reviews by the qualifying activity or its representatives. Certification will not normally be extended beyond the two-year period without a reaudit.

All qualification tests, conformance inspections, and screening must be performed at facilities, which have DSCC-VQE Laboratory Suitability Status for each of the applicable test methods.

Note: The results of the DSCC audit held on October 21<sup>st</sup> & 22<sup>nd</sup> 2008 were found by examining a sampling of the manufacturer's normal processing procedures. The acceptance of the corrective actions from the above referenced audit does not relieve the manufacturer of its contractual obligation to deliver product that complies with all specification requirements.

Sincerely,

For

JOSEPH GEMPERLINE  
Chief  
Sourcing and Qualifications Division
