

Half-Size Crystal Can Welded • DPDT Dry Circuit to 2 Amps Welded • DPDT

Half-Size Crystal Can Welded • DPDT Dry Circuit to 2 Amps Welded • DPDT

- **UNIVERSAL CONTACTS**...permit operation from dry circuit to rated load with the same contact set.
- **UNIQUE HEAT SINK/MAGNETIC FLUX CONDUCTOR**...improves heat dissipation characteristics—insures lower temperature rise.
- **SPECIALLY-DESIGNED MAGNETIC CIRCUIT**...locates armature inside coil for more efficient switching action.

SPECIFICATIONS

GENERAL

Contact Arrangement.....2PDT (2 Form C)
Magnetic Latching

Weight..... 0.25 oz approx.
Designed to meet the requirements of MIL-PRF-39016.

PERFORMANCE

Contact Rating (Note 1)

Resistive 2 Amps @ 28 VDC or 115V 400 Hz
(Case Ungrounded)

Low Level..... 10-50 μ A @ 10-50 mv DC
or peak AC (Note 4)

Latch/Reset Power:

BR17A and BR17M 175 mw approx.

BR17B 90 mw approx.

Latch/Reset Time 3 ms max, excluding bounce
time at nominal coil voltage

Contact Bounce Time..... 2 ms max @ 2 Amps 28 VDC

Contact Resistance

Before Life 0.050 Ohms max @ rated
current, 6 or 28 VDC

After Life 0.100 Ohms max. @ rated
current, 6 or 28 VDC

ENVIRONMENTAL

Temperature Range.....-65°C to +125°C

Vibration (Note 2)..... 0.4" DA 10 - 38 Hz,
20 G's 38 - 2,000 Hz

Shock (Operating) (Note 2).....50 G's 11 ms

ELECTRICAL CHARACTERISTICS

Duty Cycle.....Continuous

Insulation Resistance

10,000 megohms @ 500V 25°C
1,000 megohms @ 500V 125°C

Dielectric Strength:

Sea Level:

Between Coils (BR17A & M)500 VRMS

Contact to Case.....1,000 VRMS

Contact to Coil.....1,000 VRMS

Coil to Case.....500 VRMS

Across Open Contacts500 VRMS

70,000 Feet

All points350 VRMS

Notes

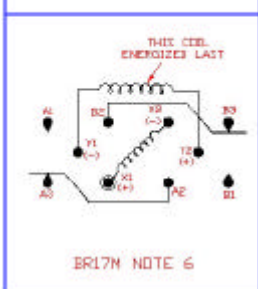

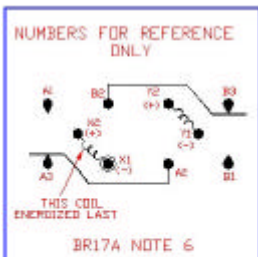

1. For case grounded loads and other ratings, consult the factory.
2. For applications requiring other shock and vibration levels, consult the factory.
3. For other ratings consult the factory.
4. Relay contacts which have switched high level currents are no longer suitable for switching low level loads.
5. Contacts were placed in the position shown by placing voltage with the polarity shown on the indicated coil (reset). To switch contacts, a voltage of indicated polarity must be applied to the other coil (Latch).
6. Contacts were placed in position shown by placing voltage with the polarity indicated on the coil. To switch contacts a voltage of the reverse polarity must be applied to the coil.

GENERAL NOTES

- Unless otherwise specified, all tests made at nominal coil voltages, @ 25°C.
- For special coil variations, switching configurations, terminals styles and mounting types, consult the factory.
- Unless otherwise specified, tolerances on decimal dimensions are ± .010".
- Specifications contained herein are subject to change without notice.

Microsemi Corporation (Nasdaq: MSCC) offers a comprehensive portfolio of semiconductor and system solutions for communications, defense & security, aerospace and industrial markets. Products include high-performance and radiation-hardened analog mixed-signal integrated circuits, FPGAs, SoCs and ASICs; power management products; timing and synchronization devices and precise time solutions, setting the world's standard for time; voice processing devices; RF solutions; discrete components; security technologies and scalable anti-tamper products; Power-over-Ethernet ICs and midspans; as well as custom design capabilities and services. Microsemi is headquartered in Aliso Viejo, Calif., and has approximately 3,400 employees globally. Learn more at www.microsemi.com.

Microsemi makes no warranty, representation, or guarantee regarding the information contained herein or the suitability of its products and services for any particular purpose, nor does Microsemi assume any liability whatsoever arising out of the application or use of any product or circuit. The products sold hereunder and any other products sold by Microsemi have been subject to limited testing and should not be used in conjunction with mission-critical equipment or applications. Any performance specifications are believed to be reliable but are not verified, and Buyer must conduct and complete all performance and other testing of the products, alone and together with, or installed in, any end-products. Buyer shall not rely on any data and performance specifications or parameters provided by Microsemi. It is the Buyer's responsibility to independently determine suitability of any products and to test and verify the same. The information provided by Microsemi hereunder is provided "as is, where is" and with all faults, and the entire risk associated with such information is entirely with the Buyer. Microsemi does not grant, explicitly or implicitly, to any party any patent rights, licenses, or any other IP rights, whether with regard to such information itself or anything described by such information. Information provided in this document is proprietary to Microsemi, and Microsemi reserves the right to make any changes to the information in this document or to any products and services at any time without notice.
