Products built with copper wire have a different set of bills-of-material (BOM), which is more suitable for copper wire and will provide better quality and reliability. Please request details from Microsemi SoC Products Group on the BOM for copper wire if you have questions.

There is no expected change to package moisture sensitivity level (MSL), product functionality, performance, quality, reliability, or the product datasheet.

A follow-up 90 day advance Product Change Notification (PCN) with applicable qualification report reference will be sent prior to the first customer shipment for product listed in Table 2.

Feel free to contact Microsemi SoC Product Group Technical Support if you require any further information: soc_tech@microsemi.com.
