PCN change level: Major

Subject: New Fabrication Vendor for ProASIC3 Product Family

Dear Customer,

This notification is to inform you that Actel has expanded its manufacturing of the A3P060, A3P125, and A3P250 ProASIC3 devices to include UMC (United Microelectronics Corp). UMC's process is being qualified as a second source foundry to better support Actel's ProASIC3 capacity requirements.

While we have added UMC to our manufacturing portfolio, Actel will continue to manufacture the same ProASIC3 products at Infineon (IFX). Effective October 2007 Actel will begin shipping select devices of the ProASIC3 product family from both UMC and Infineon foundries.

Qualification reports FP-110 and FP-111 will be available in October 2007. Samples in selected device and package combinations will be available August 2007.

For questions please contact Actel's Corporate Applications hotline at tech@actel.com.

Regards,

Actel
