Subject: Nonvolatile and volatile memory on the Actel FlashPro4 Programmer

Dear Actel Customer,

Actel's FlashPro4 Programmer, designed and manufactured by Actel Corporation, has no memory devices within the unit that permanently store FPGA design data.

As soon as power is removed from the FlashPro4 Programmer, all FPGA design related data is lost.

This concludes the information outlined in the subject line of this letter.

No further details are available regarding the above subject.

Regards,

Wendy Lockhart
