

Process/Product Change Notification

PCN No: 2010-002
Date: Apr. 5th 2010
Subject: P/N change for Plastic diodes supplied to Hi Rel customers

To: <Customer Details>

Microsemi Intends to make a change to our process/product and seeks your

- i) Approval
ii) Acknowledgement of the PCN

Description of Change:

Add 'M' prefix to all plastic product supplied to Hi Rel customers and their subcontractors
- see appendix 1 for list of all parts affected

Example from SMBJ48CA to MSMBJ48CA

Justification:

Going forward Microsemi plans on supplying standard plastic diodes procured from several 3rd party global suppliers for the high volume commercial market sectors. This P/N change is necessary to identify the Microsemi controlled product that we will continue to supply in smaller volumes to the Hi Rel – Avionics, Medical and Military markets.

Note: There will be no change to the actual parts supplied to the high Rel customer base – they will continue to be built at the same approved Sub-contractor using MSCC qualified die & processes.

Microsemi contact Person(s):

- 1) Your normal field sales or MSCC sales office contact
- 2) Shane O'Donnell – Applications Engineer – Microsemi Ireland
sodonnell@microsemi.com

Any questions, please contact either of the undersigned

Yours Sincerely

Richard Finn
VP & General Mgr.
