Microsemi Corporation (Nasdaq: MSCC) offers a comprehensive portfolio of semiconductor and system solutions for communications, defense and security, aerospace, and industrial markets. Products include high-performance and radiation-hardened analog mixed-signal integrated circuits, FPGAs, SoCs, and ASICs; power management products; timing and synchronization devices and precise time solutions; voice processing devices; RF solutions; discrete components; enterprise storage and communications solutions; security technologies and scalable anti-tamper products; Ethernet solutions; Power-over-Ethernet ICs and midspans; custom design capabilities and services. Microsemi is headquartered in Aliso Viejo, California and has approximately 4,800 employees world-wide. Learn more at www.microsemi.com

Microsemi makes no warranty, representation, or guarantee regarding the information contained herein or the suitability of its products and services for any particular purpose, nor does Microsemi assume any liability whatsoever arising out of the application or use of any product or circuit. The products sold hereunder and any other products sold by Microsemi have been subject to limited testing and should not be used in conjunction with mission-critical equipment or applications. Any performance specifications are believed to be reliable but are not verified, and Buyer must conduct and complete all performance and other testing of the products, alone and together with, or installed in, any end-products. Buyer shall not rely on any data and performance specifications or parameters provided by Microsemi. It is the Buyer's responsibility to independently determine suitability of any products and to test and verify the same. The information provided by Microsemi hereunder is provided "as is, where is" and with all faults, and the entire risk associated with such information is entirely with the Buyer. Microsemi does not grant, explicitly or implicitly, to any party any patent rights, licenses, or any other IP rights, whether with regard to such information itself or anything described by such information. Information provided in this document is proprietary to Microsemi, and Microsemi reserves the right to make any changes to the information in this document or to any products and services at any time without notice.

1 Introduction

Do you need access to technical documents or other resources for Microsemi's Ethernet switch, PHY, software, IP, signal conditioner, and crosspoint switch products (those previously provided by Vitesse Semiconductor)? As a result of the transition of this content from vitesse.com to microsemi.com, you may now access this information at:

- Ethernet switches, PHYs, software, and IP:
<http://www.microsemi.com/products/ethernet-solutions/ethernet-solutions>
- Signal conditioners:
<http://www.microsemi.com/products/switches/signal-conditioners>
- Crosspoint switches:
<http://www.microsemi.com/products/switches/digital-cross-point-switches>

(Before you access the new locations, it is recommended that you clear your browser cache.)

NDA-protected documents may be accessed after logging in with your previous vitesse.com credentials. If you have not previously registered for an account, you will need to do so by following the instructions outlined below. Please note:

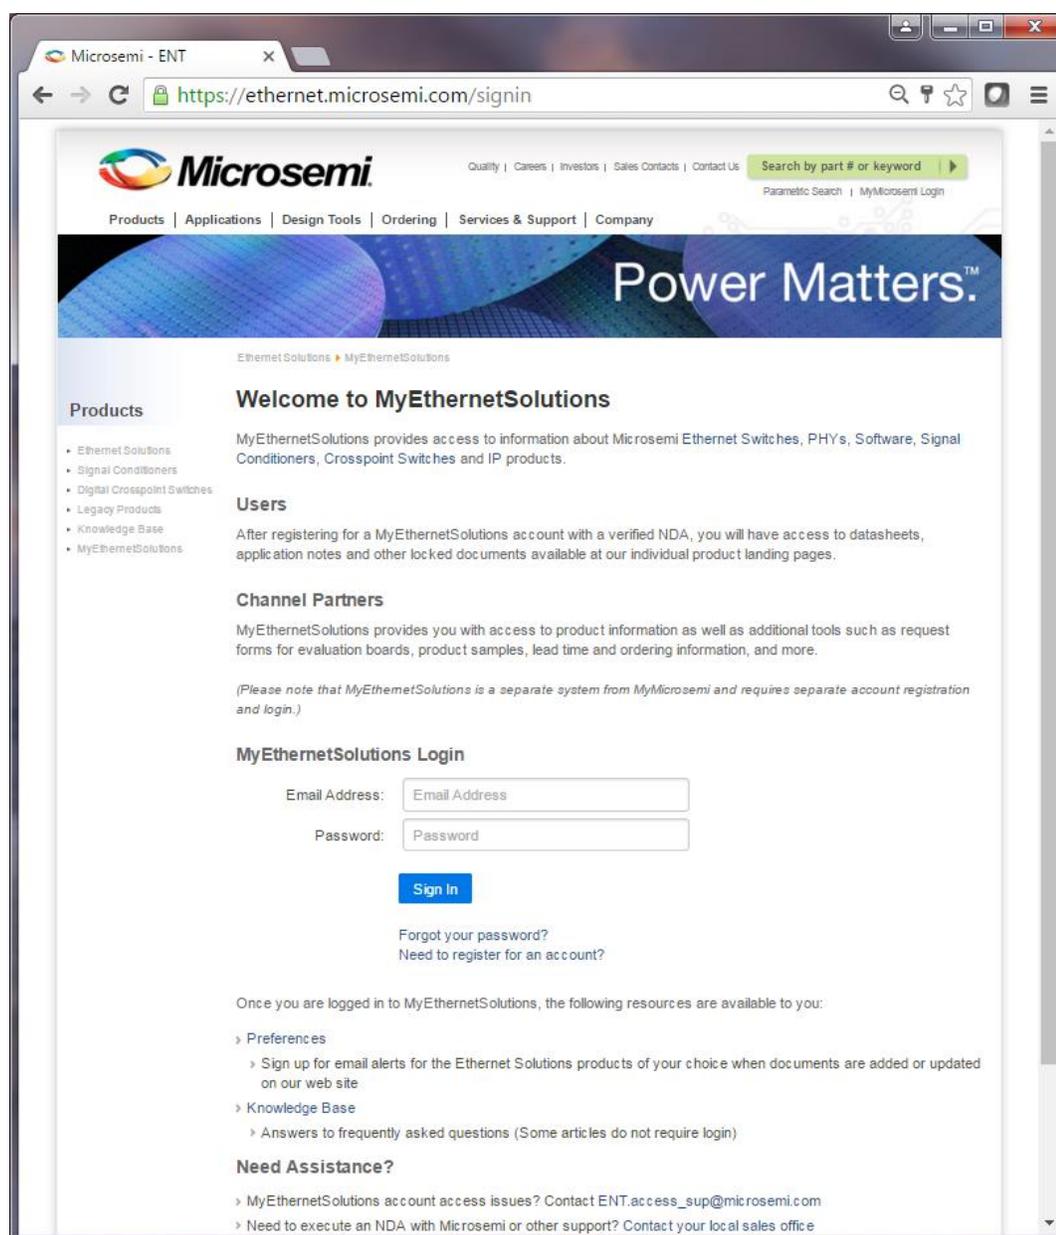

- Product briefs provide a high-level feature overview for each product and are available for download without the need for an account. To view these product briefs, simply visit the applicable product pages.
- NDA-protected documents, including most datasheets and application notes, are only to be viewed by customers with a valid NDA (available through your [local sales contact](#)), or by Microsemi representatives and distributors with approved agreements in place. Contact ENT.access_sup@microsemi.com if you have questions or difficulties with access permissions once an NDA is in place and your sales representative has arranged for your account to be upgraded to NDA-level access.
- As download activity is tracked, Microsemi may follow up with you to understand your interest in a particular product.

2 MyEthernetSolutions

MyEthernetSolutions (<https://ethernet.microsemi.com/signin>) is a central login gateway for Ethernet Solutions product content that provides access to locked documents for approved users, and also provides access to sales tools for Microsemi channel partners. Your previous Vitesse login credentials may be used here, or you may register for an account if you do not have one.

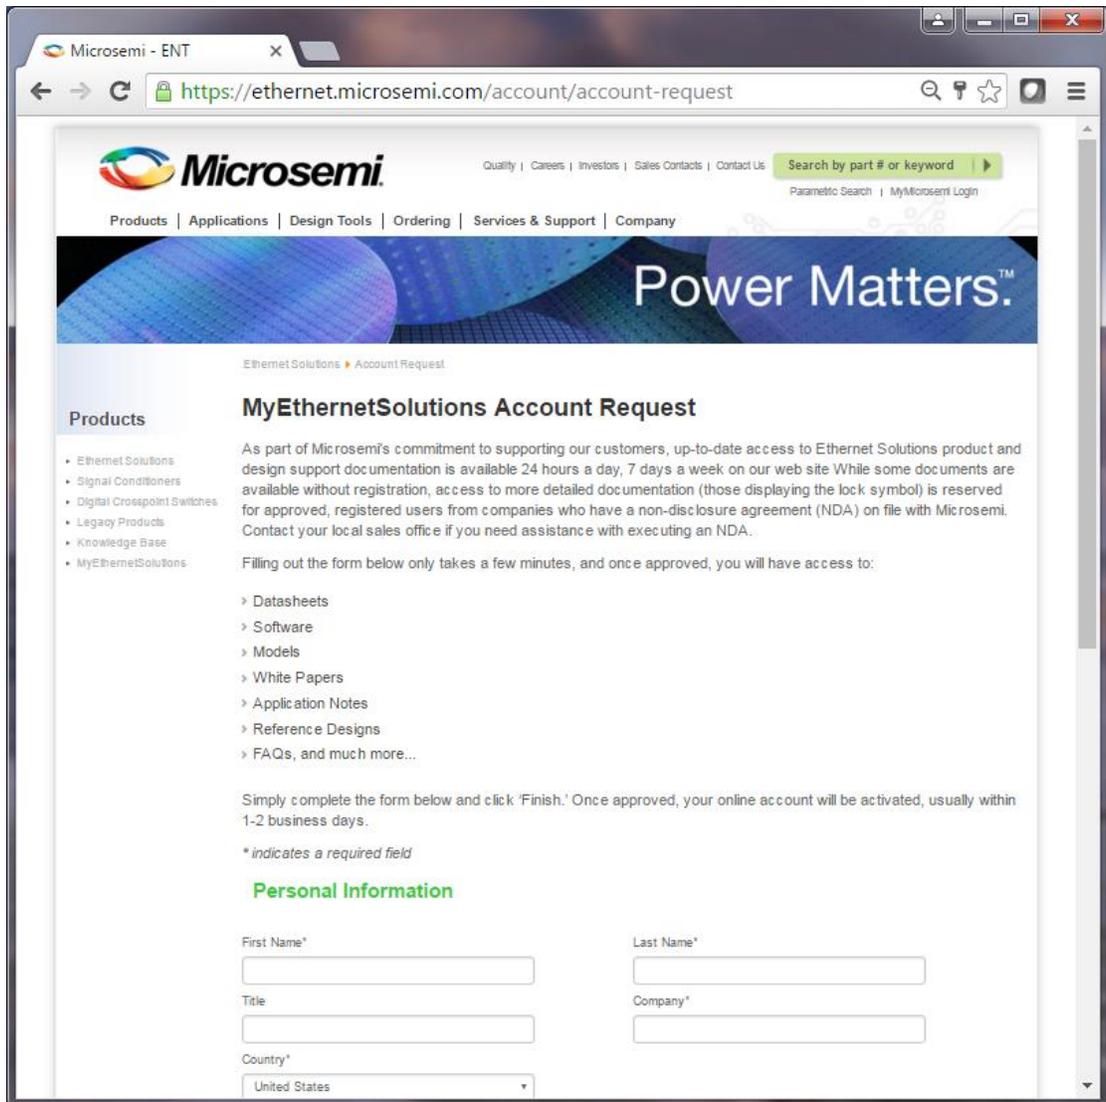

A link to MyEthernetSolutions is provided in the left navigation area for each of the product categories listed in the Introduction of this document.

Note: MyEthernetSolutions should not be confused with MyMicrosemi. MyMicrosemi is a different service offered by Microsemi with a separately managed login and password, and will not provide access to the product categories described in this document.

2.1 MyEthernetSolutions Account Request and Login Instructions

1. If you have already registered for an account previously (either at MyEthernetSolutions or at vitesse.com) and have your login credentials, [jump](#) to step 7. Otherwise:
 - a. If you have already registered but have forgotten your password, click the “Forgot your password?” link or visit <https://ethernet.microsemi.com/account/forgot-password>
 - b. If you need to register for an account, click the “Need to register for an account?” link or visit <https://ethernet.microsemi.com/account/account-request> (see below).

The screenshot shows a web browser window with the URL <https://ethernet.microsemi.com/account/account-request>. The page features the Microsemi logo and navigation links. The main heading is "MyEthernetSolutions Account Request". Below this, there is a paragraph explaining that access to Ethernet Solutions product and design support documentation is available 24 hours a day, 7 days a week on the website. It notes that while some documents are available without registration, access to more detailed documentation (those displaying the lock symbol) is reserved for approved, registered users from companies who have a non-disclosure agreement (NDA) on file with Microsemi. Contact your local sales office if you need assistance with executing an NDA.

Filling out the form below only takes a few minutes, and once approved, you will have access to:

- › Datasheets
- › Software
- › Models
- › White Papers
- › Application Notes
- › Reference Designs
- › FAQs, and much more...

Simply complete the form below and click 'Finish.' Once approved, your online account will be activated, usually within 1-2 business days.

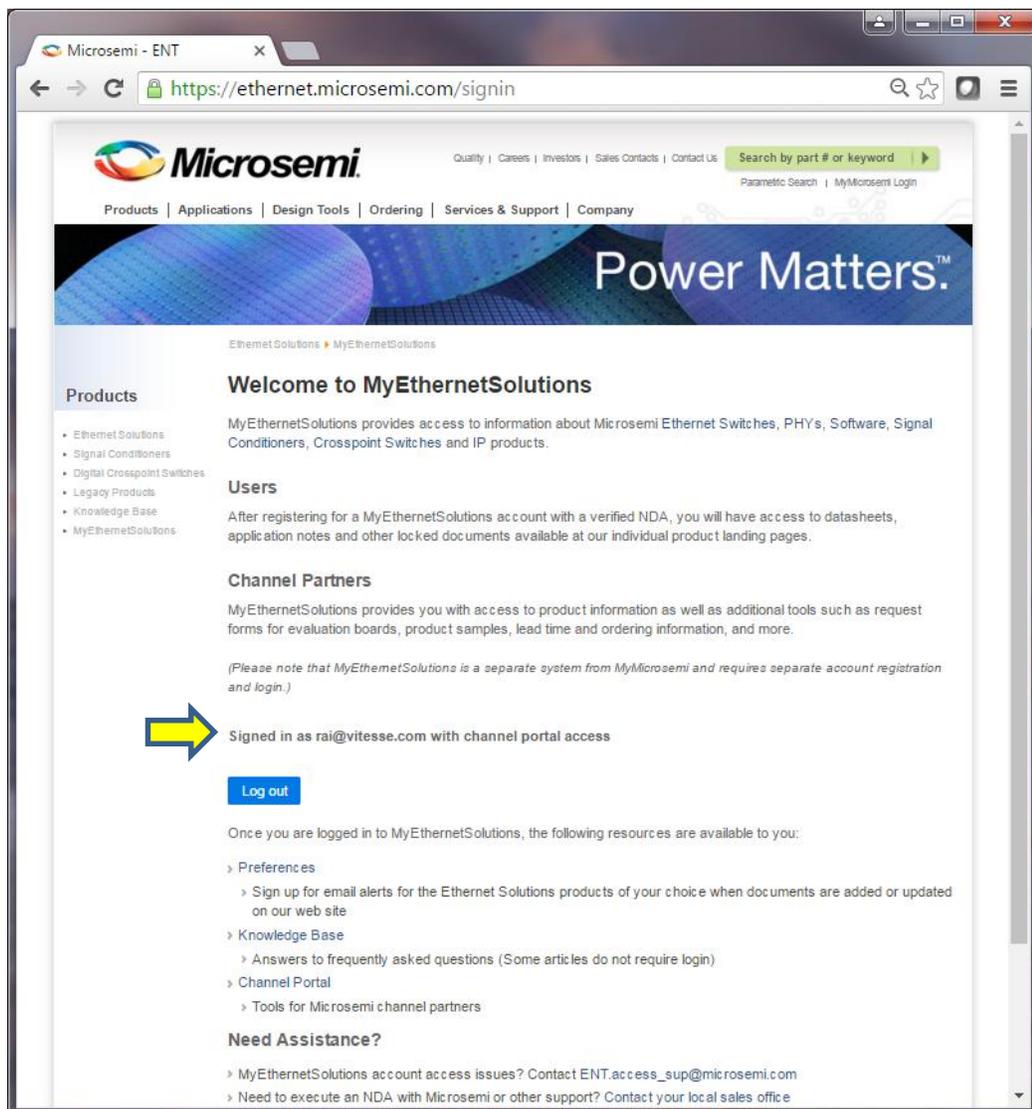

* indicates a required field

Personal Information

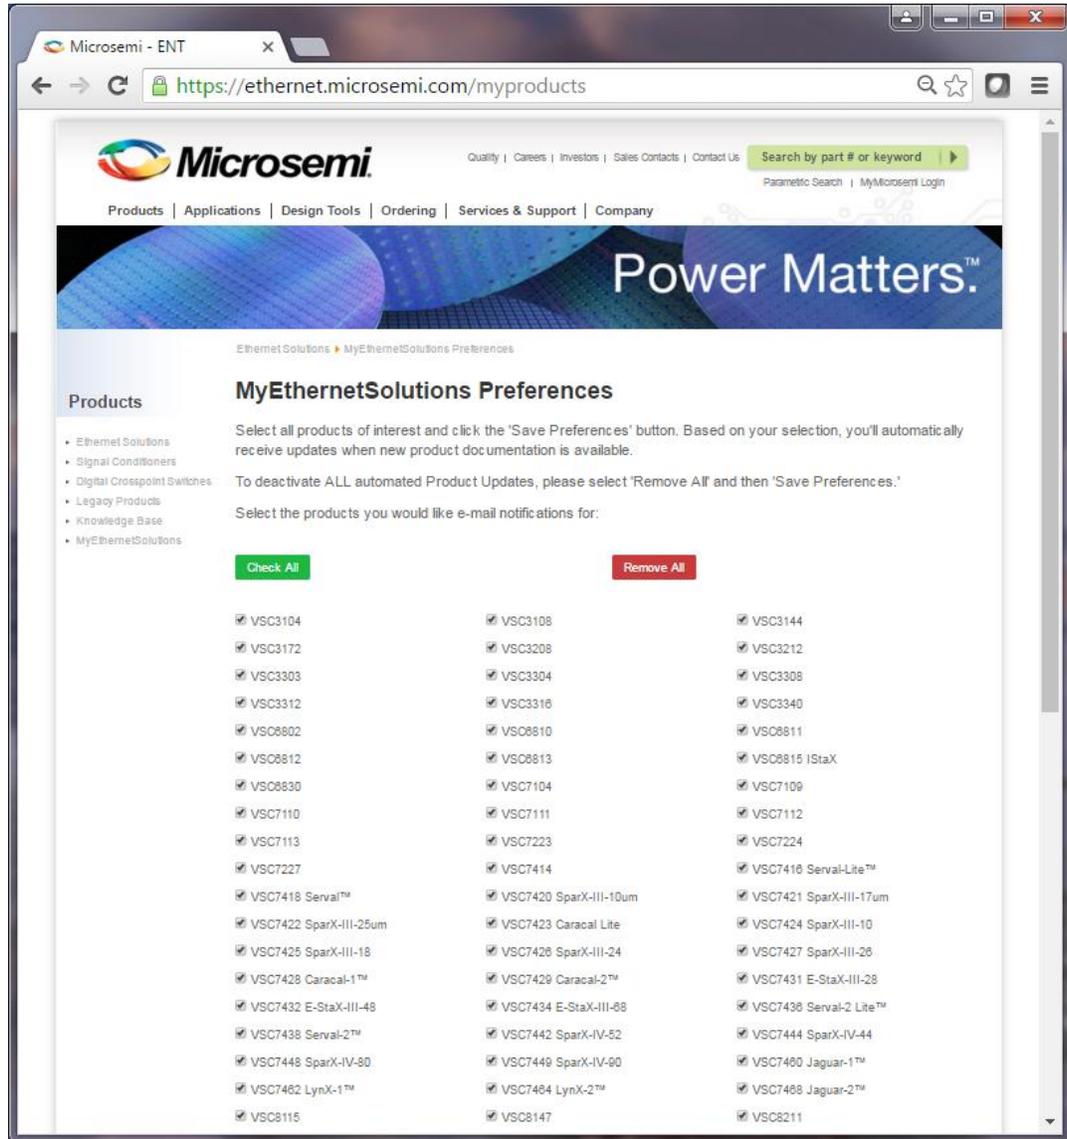

| | |
|--|----------------------|
| First Name* | Last Name* |
| <input type="text"/> | <input type="text"/> |
| Title | Company* |
| <input type="text"/> | <input type="text"/> |
| Country* | |
| <input type="text" value="United States"/> | |

2. Scroll down the page and enter your profile details. Your email address should have a valid domain (either microsemi.com for Microsemi employees, or, a domain from an approved Microsemi distributor, representative, or NDA-level customer). Generic domains (e.g. gmail.com) are not accepted.
3. Click “Finish”. Upon successful submission you will see the message “Thank you. Please check your email to complete the registration process.”

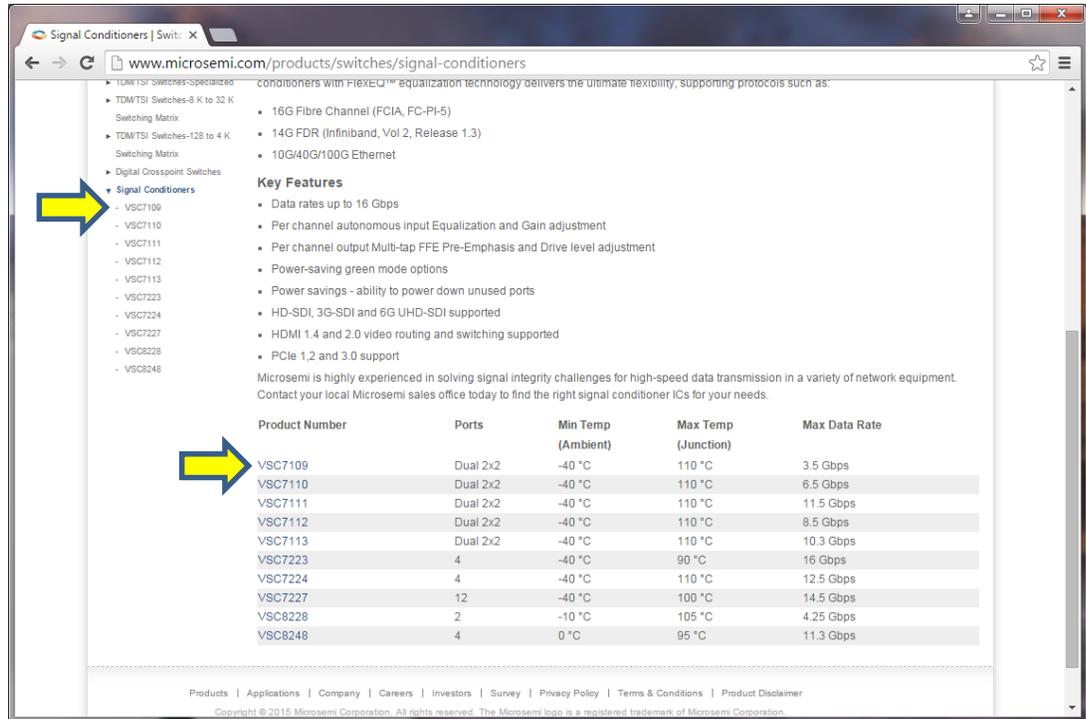

4. Check your email inbox for a message from ENT.access_sup@microsemi.com, and click on the link provided in the message to complete your registration.
5. You will see a confirmation message in your browser stating that your account is now active.
6. Once your account is active, contact your [local sales representative](#) to verify your NDA-level user access and arrange to grant your account permission to access locked content. Please note that this process may take 24–48 hours. (Sales representatives should provide the following information to ENT.access_sup@microsemi.com to grant customer NDA-level access: A copy of the fully executed NDA and NDA request form, customer's legal email domain, and a list of all Ethernet Solutions products for which access is required.)
7. Visit MyEthernetSolutions (<https://ethernet.microsemi.com/signin>) and enter your login credentials. Once logged in successfully, you will see your sign-in status confirmed (as shown below), and you may visit individual product landing pages in any one of the product categories outlined in the Introduction of this document to access locked content. Channel partners will also find a link on the MyEthernetSolutions page directing them to a list of sales tools on the Channel Portal. You may return to this page at any time to log out.

8. Once signed in to MyEthernetSolutions, you may opt in to receive alerts for the active Ethernet Solutions products of your choice. The alerts are sent to you through email when documents associated with these products are added or updated on our web site. Click the link shown above, titled "Preferences," to make your selections. Check the box next to each product of your choice (as shown below), and click the "Save Preferences" button at the bottom of the page.

9. As an example of accessing locked content, let's go through the process of downloading the VSC7109 datasheet in the Signal Conditioner product area at this link:
<http://www.microsemi.com/products/switches/signal-conditioners>
 - a. After signing into MyEthernetSolutions, click on "VSC7109" in the product table or in the left-side navigation menu as shown below:

b. This will bring you to the product's landing page. Once there, scroll to the bottom of the page to reveal a list of documents for download in a table titled "Additional Resources".

- c. The VSC7109 datasheet link reveals an unlocked lock icon (🔓) in the Access column. This is your indication that you are signed in with permission to download the document. (If you attempt to download a document before signing in to MyEthernetSolutions and while its icon is still shown in the locked position, you will first be directed to the MyEthernetSolutions login page to enter your account credentials before being returned back to the product landing page to continue with your download).
- d. Once signed in to MyEthernetSolutions, you may also navigate to other product pages for which you have access and download product information for those products.

MyEthernetSolutions account access issues? Contact ENT.access_sup@microsemi.com

Need to execute an NDA with Microsemi, upgrade your MyEthernetSolutions account to NDA-level access or receive other support? Contact your [local sales office](#)
