

Microsemi Corporation

August 2016

Product/Process Change Notification No: 2016-012

Change Classification: Major

Subject: Change of Wafer Fabrication location for Power Schottky Die Source

Description of Change: Microsemi Garden Grove Wafer Fabrication site is ceasing the Schottky die process. This silicon based die is used in the part number listing below. As a result of the cessation, Microsemi DPG will qualify select Schottky die processes in another internal Microsemi location.

Reason for Change: Cessation of Microsemi Garden Grove Silicon Schottky Die process

Application Impact: Microsemi is currently fulfilling orders with bridging inventory/Garden Grove die bank for the affected part numbers.

Method of Identifying Changed Product: Product built using the internal Microsemi location Schottky die will have an assembly date code which will indicate the change – the customer base will be informed of this date code by amendments to this PCN. Any MIL qualified product will have a date code prefix indicating the other Microsemi location as the die source as listed in QPDSIS-19500.

Products Affected by this Change: See below. Please note that all other Microsemi locations will continue processing schottky barrier diode and other discretes as before.

Production Shipment Schedule: Qualification of internal Microsemi location Schottky die source will be complete by end of April 2017.

Qualification Plan: Qualification of each product family will be performed per the requirements of MIL-PRF-19500.

Samples Availability: Not applicable.
