Microsemi Adaptec® 8885/8885Q in 2U Chassis

8885/8885Q RAID adapter with right angle mini SAS HD cable connectors and external cable connector in a generic 2U chassis that has sixteen 2.5" drive bays with mini SAS connectors in their backplanes and an external rackmount storage unit.

Requirements
2U chassis are one of the most common rack-mount configurations because of the low profile footprint, and the industry’s adoption of 2.5" small form factor (SSF) drives for maximum storage capacity. For the most storage intensive applications, external JBOD rack mount systems are also a key component of this configuration. This presents some challenges for RAID adapter cards with respect to:

- Height of the boards
- Limited performance of a PCIe Gen3 RAID card with only 8 ports
- Cables with straight connectors
- Expander modules/backplanes

Series 8 RAID Solution
The 16-port RAID adapter, an MD2 low-profile card, easily plugs into a PCI Gen3 slot with 200 FLP airflow with a PCIe riser card, and delivers maximum performance for up to 16 drives without the need for an expander.

- Two external connectors allow for a redundant connection to JBOD (optional). Daisy chaining multiple JBODs is also possible.
- Microsemi’s new right-angle connectors are an ideal solution; the straight connector cables can also be used in this configuration. For more information about SAS HD cables visit: [http://www.microsemi.com/products/storage/cables-accessories/cables-accessories](http://www.microsemi.com/products/storage/cables-accessories).

16-Port RAID Card with 2 Internal and 2 External Cables and JBOD Enclosure Configuration
- 8885 or 8885Q: 16 native SATA ports (8 internal and 8 external) MD2 low-profile.
- The ACK-I-rA-HDmSAS-mSAS-.8M is an internal right angle mini serial attached SCSI HD x4 (SFF-8643) to mini serial attached SCSI HD x4 (SFF-8087) cable. It measures 1 meter and is used for connecting a SAS/SATA adapter to a SAS/SATA backplane. Ordering part number: 2280200-R.
- The ACK-I-HdmSAS-mSAS-1M is an internal mini serial attached SCSI HD x4 (SFF-8643) to mini serial attached SCSI x4 (SFF-8087) cable. It measures 1 meter and is used for connecting a SAS/SATA adapter to a SAS/SATA backplane. Ordering part number: 2279700-R.
- The ACK-E-HdmSAS-mSAS-2M is an external mini serial attached SCSI HD x4 (SFF-8644) to mini serial attached SCSI x4 (SFF-8088) cable. It measures 2 meters. Ordering part number: 2280300-R.
- Optional (for 8885)—Flash Module 700 (AFM-700): add-on super capacitor module for maintenance-free cache protection with real-time monitoring.

Microsemi Corporation (Nasdaq: MSCC) offers a comprehensive portfolio of semiconductor and system solutions for aerospace & defense, communications, data center and industrial markets. Products include high-performance and radiation-hardened analog mixed-signal integrated circuits, FPGAs, SoCs and ASICs; power management products; timing and synchronization devices and precise time solutions, setting the world’s standard for time; voice processing devices; RF solutions; discrete & defense, communications, data center and industrial markets. Products include high-performance and radiation-hardened analog mixed-signal integrated circuits, FPGAs, SoCs and ASICs; power management products; timing and synchronization devices and precise time solutions, setting the world’s standard for time; voice processing devices; RF solutions; discrete components; enterprise storage and communication solutions, security technologies and scalable anti-tamper products; Ethernet solutions; Power-over-Ethernet ICs and midspans; as well as custom design capabilities and services. Microsemi is headquartered in Aliso Viejo, California and has approximately 4,800 employees globally. Learn more at [www.microsemi.com](http://www.microsemi.com).
