Accelerate Ecosystem Partner Program
Technology Collaboration • Joint Marketing • Sales Acceleration

Partnerships are at the core of our success. Microsemi’s Accelerate program creates an ecosystem of industry partners that facilitates collaboration amongst leading silicon, IP, systems, software, and design experts to deliver validated solutions that speed up time-to-market for end customers and time-to-revenue for partners.

Why Partner with Microsemi?
The Accelerate program brings together an extensive network of leading solutions providers to help expedite time-to-market for our customers. Program benefits include the following:

**Technology Collaboration**
- Early access to new Microsemi products
- Platform strategy, demos, and design workshops
- Solution integration and support

**Joint Marketing**
- Microsemi website link to partner website
- Support for partner press release
- Co-marketing at select industry trade shows

**Sales Acceleration**
- Joint regional marketing events
- Three-way engagements with Microsemi field/channel teams and end-customers
- Integrated Microsemi-partner solution demos

We are committed to accelerating our partners’ success by providing industry-leading tested solutions with faster time-to-market. Microsemi’s Accelerate ecosystem unifies solutions and technologies from across our broad portfolio to help our partners integrate, test, and deliver pre-validated board or system solutions to end customers in key vertical markets such as data center, communications, industrial, and aerospace & defense.

Microsemi’s Accelerate ecosystem encompasses multiple types of collaborations, including:

- **Strategic Alliance Partners**: Extensive collaborations with industry-leading players for solutions encompassing multiple technologies
- **Reference Design Partners**: Solutions around Microsemi’s silicon partners in the CPU, NPU, GPU, and SoC space
- **Technology Partners**: Independent software vendors (ISVs), IP core, EDA, and independent hardware vendors (IHVs) compatible with Microsemi SoCs and systems
- **Platform Partners**: Original design manufacturers (ODMs), joint design manufacturers (JDMs), and design houses that design and build boards, systems, and platforms around Microsemi silicon on behalf of end customers

Microsemi also actively participates in multiple industry communities, consisting of standards or academic groups focused on specific horizontal or vertical markets, architectures, standards, and trends (such as OpenPower, MEF, and NBASE-T Alliance).

Microsemi Corporation (Nasdaq: MSCC) offers a comprehensive portfolio of semiconductor and system solutions for aerospace & defense, communications, data center and industrial markets. Products include high-performance and radiation-hardened analog mixed-signal integrated circuits, FPGAs, SoCs and ASICS; power management products; timing and synchronization devices and precise time solutions, setting the world’s standard for time; voice processing devices; RF solutions; discrete components; enterprise storage and communication solutions, security technologies and scalable anti-tamper products; Ethernet solutions; Power-over-Ethernet ICs and midspans; as well as custom design capabilities and services. Microsemi is headquartered in Aliso Viejo, California and has approximately 4,800 employees globally. Learn more at [www.microsemi.com](http://www.microsemi.com).

Microsemi makes no warranty, representation, or guarantee regarding the information contained herein or the suitability of its products and services for any particular purpose, nor does Microsemi assume any liability whatsoever arising out of the application or use of any product or circuit. The products sold hereunder and any other products sold by Microsemi have been subject to limited testing and should not be used in conjunction with mission-critical equipment or applications. Any performance specifications are believed to be reliable but are not verified, and Buyer must conduct and complete all performance and other testing of the products, alone and together with, or installed in, any end-products. Buyer shall not rely on any data and performance specifications or parameters provided by Microsemi. It is the Buyer's responsibility to independently determine suitability of any products and to test and verify the same. The information provided by Microsemi hereunder is provided "as is, where is" and with all faults, and the entire risk associated with such information is entirely with the Buyer. Microsemi does not grant, explicitly or implicitly, to any party any patent rights, licenses, or any other IP rights, whether with regard to such information itself or anything described by such information. Information provided in this document is proprietary to Microsemi, and Microsemi reserves the right to make any changes to the information in this document or to any products and services at any time without notice.
