**Dimensions**

Size: 27.5 x 15 mils  
Thickness: 5 mils  
Bond Pad Size: 3.5 x 8.4 mils

**Features**

- Low Capacitance (45 fF Typ.)
- Low Series Resistance (5 Ω Typ.)
- 2 Nanosecond Switching Speed
- Silicon Nitride Passivation
- Large Gold Bond Pads

**Specifications @ 25°C**

- $V_F$ (10 mA): 1.45 V Max.
- $V_R$ (10 μA): 40 V Min.
- $R_S$ (10 mA, 1 GHz): 7 Ω Max., 5 Ω Typ.
- $C_T$ (10 V, 1 MHz): 55 fF Max., 45 fF Typ.

**Description**

The MP6250 is a GaAs Flip Chip PIN Diode designed for use in microwave and millimeterwave switches, attenuators and phase shifters. GaAs PIN diodes feature low zero bias capacitance and conductance, fast switching speed and its ability to be driven directly by low-cost TTL drivers.

These flip chip PIN diodes incorporate Microsemi’s expertise in GaAs material processing, silicon nitride protective coatings and high temperature metalization. The flip chip design maintains the high frequency performance features of a beam lead structure in a more rugged surface mount configuration.
